

7 BENEFITS OF TRUE DC AIR CONDITIONING

Dantherm DC Air Conditioners use true 48VDC compressors and fans, which make a huge difference in performance, energy efficiency and operating costs, and here's why:

Dantherm's DC Air Conditioners can be used in a variety of applications:

Off-grid sites with DC directly from the power source;
Hybrid sites

Sites with unstable power supply resulting in frequent use of battery power & repeated need for DC-powered cooling

Sites with renewable power sources such as solar, wind, fuel cells or hydro

Sites with the need for cooling even during power outages such as security communication networks like Tetra and safety networks.
